Small Business Loan

Fund Your Goals with a Small Business Loan

- A small business loan is any funding option specifically designed for a small business. Small business loans allow existing or newly established companies to borrow money from lenders. Each loan type exists to help entrepreneurs meet different goals. Additionally, each loan works depending on the type of loan.

Business Line of Credit

- A business line of credit is a flexible financing option that allows businesses to borrow funds as needed, similar to a credit card. Interest is paid only on the borrowed amount, and funds can be used for various purposes like managing cash flow or covering unexpected expenses. Once repaid, the credit becomes available again, making it a revolving form of credit that can be accessed repeatedly.
